

## RasterMaster® Conversion & Imaging SDK

RasterMaster® is the industry's leading document/image conversion and imaging library for Java and .NET. It is continually enhanced with new functionality and formats and was developed by Snowbound's experts who have over a hundred years of combined imaging expertise. Fortune 2000 companies with millions of users—including top banks, insurance companies, healthcare, shipping, and industry leading document management companies—have depended on this product for over two decades to serve their most urgent and demanding applications.

### High-Speed File Conversion

RasterMaster® is the fastest file conversion SDK on the market. Users can quickly convert files on the fly for viewing or batch convert large documents in a variety of formats. The SDK's document-oriented API for MS Office documents introduces stateless processing of document information, which greatly reduces processing time of subsequent pages and results in significant performance improvements, especially valuable for extremely large documents. Special features, including conversion via Byte Array, is also available for high performance applications.

### Available for Multiple Platforms

- Java: for all computing platforms, including Unix, Windows, Mac, Linux, AWS, Google Cloud, Azure, and IBM Cloud
- NET (x64): for Windows native applications

### Extensive Format Support

AFP, DWG/CAD, JPEG, MO:DCA, PDF, MS Office, TIFF, SVG, PNG, and hundreds more file formats are supported. Converts any file to PDF or TIFF to ensure universal compatibility. RasterMaster also includes both PDF/A and SVG output support, enabling long term archiving and high resolution viewing.

### Easy-to-Use APIs

RasterMaster is flexible enough to meet the needs of all your imaging and conversion related development projects. Numerous samples and code snippets are available for developers and our fast support gets users up and running quickly.

### Hundreds of Robust Features & Functions

Advanced tools allow developers to meet their case management needs by creating applications with functions such as OCR and pattern-based text searching, true redaction and annotation, watermarks, and document manipulation features like split, merge, reorder, add, delete, extract, and export.

### Advanced image Clean-Up Tools

DocClean™ module enables developers to incorporate expert image clean-up capabilities into any Java or .NET application, greatly enhancing document processing with the ability to straighten or rotate skewed scanned images through auto invert, auto orient and deskew capabilities.

### No Additional Applications Required

RasterMaster performs all processing and conversion functions without the requirement of external applications, such as MS Office and Adobe.

## Responsive in-house support

Our expert, responsive internal support team is available to answer your questions 24x7 with multiple support response levels available for mission critical processes.

## Our Customers

Hundreds of companies around the globe have employed RasterMaster SDK to fulfill their document and imaging processing needs. Snowbound is proud to call firms including Allstate Insurance, IBM, McKesson and many government agencies such as the USPS, our customers.

## Our Technology

Our SDKs are built by a team with over 100 years of imaging expertise and are continually enhanced to support the latest industry trends and business requirements. This ensures that you are developing with the most up-to-date, reliable and mature imaging technology in the industry. Our SDKs are designed to be flexible while providing an extensive array of functions, features, and formats. Our APIs also remain consistent with each release to ensure a seamless transition when you upgrade. This enables you to take advantage of the latest feature and format support without having to re-write code from your previous development efforts. When you develop with RasterMaster, you can be confident that your requirements will be met for all of your imaging related development projects, today and in the future.

For over two decades, Snowbound Software has been the independent leader in document viewing and conversion technology. It plays an integral role in enhancing and speeding company workflows for the Fortune 2000, including insurance claims processing, financial transactions, medical records and more. Snowbound excels in providing customers with powerful solutions for capturing, viewing, processing, and archiving hundreds of different document and image types. Thanks to its multi-environment support, Snowbound's products operate across all popular platforms and can be easily integrated into new or existing enterprise content management systems. Nine of the 10 largest banks in the United States (seven of 10 in the world), as well as some of the biggest healthcare providers, government agencies, and insurance companies rely on Snowbound for their mission-critical needs.
